

# MOHAB MOHAMED ABDELMONEM

## E-commerce Frontend Developer | Storefront Specialist

Mansoura, Egypt | 01007599123 | mohabmohamedd772@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

### PROFESSIONAL SUMMARY

E-commerce Frontend Developer focused on building and customizing production storefronts across Salla, Zid, Shopify, and WordPress. Experienced in translating brand identities into polished customer-facing experiences using custom JavaScript, CSS, responsive layouts, product-page improvements, navigation, promotional sections, and conversion-focused UX. Delivered work across 25 live storefronts, with a strong focus on Arabic-first experiences, mobile shopping clarity, storefront performance, and maintainable platform-compatible customization.

### E-COMMERCE EXPERIENCE

#### Web Developer - E-commerce

2025 - Present

- Designed and customized 25 live storefronts across Salla, Zid, Shopify, and WordPress for different brands and commerce categories.
- Built custom JavaScript/CSS solutions for headers, navigation, hero banners, product cards, product pages, sliders, testimonials, FAQs, blog sections, promotional blocks, location/map experiences, and other storefront interactions.
- Improved mobile responsiveness, visual hierarchy, product discovery, CTA placement, trust content, and conversion-focused user flows while preserving platform stability and maintainability.
- Turned brand identities, Figma/design references, and business requirements into production-ready storefront experiences with consistent UI across desktop and mobile.
- Troubleshoot live-store issues, refined existing themes without rebuilding the platform, and optimized custom code to reduce unnecessary UI and performance overhead.

## STOREFRONT CAPABILITIES

---

**Storefront Customization** - Customize existing themes and platform storefronts without disrupting core commerce functionality.

**Brand-to-Web Implementation** - Translate visual identity, design references, and campaign direction into consistent live storefront UI.

**Custom JavaScript & CSS** - Create platform-compatible interactions and styling for navigation, sliders, cards, sections, product pages, and custom UX.

**Responsive Commerce UX** - Improve shopping clarity across desktop, tablet, and mobile with Arabic-first responsive behavior and RTL support.

**Conversion-focused UI** - Strengthen CTA visibility, product discovery, social proof, trust content, offers, and the path from browsing to purchase.

**Performance & QA** - Reduce avoidable frontend overhead, debug production issues, and test customizations across devices and browsers.
