

MOHAB MOHAMED ABDELMONEM

Frontend & E-commerce Developer

Mansoura, Egypt | 01007599123 | mohabmohamedd772@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Frontend & E-commerce Developer specializing in Vue 3, Nuxt 3, TypeScript, and conversion-focused storefront customization. Experienced across Salla, Zid, Shopify, WordPress, and custom frontend stacks, with hands-on work in custom JavaScript/CSS, responsive UI, product discovery, branded sections, RTL/LTR experiences, SEO, performance, and reusable component systems. Combines product-level frontend engineering with commercial storefront thinking to build experiences that are clear, fast, maintainable, and designed around the customer journey.

EXPERIENCE

Web Developer - E-commerce

2025 - Present

- Designed and customized 25+ production storefronts across Salla, Zid, Shopify, and WordPress for brands in retail, coffee, food, beauty, fragrances, education, jewelry, and home products.
- Built custom JavaScript/CSS enhancements for headers, navigation, hero banners, product cards, product pages, sliders, testimonials, FAQs, blogs, promotional sections, location/map experiences, and brand-specific interactions.
- Improved mobile responsiveness, visual hierarchy, product discovery, trust content, CTA placement, and conversion-focused flows while keeping platform compatibility and maintainable code.
- Translated brand identities and design references into polished live storefronts, troubleshooting production issues and iterating directly against real customer-facing pages.

Frontend Developer

2024 - Present

- Develop and maintain large-scale Vue 3/Nuxt 3 applications using TypeScript, Pinia, PrimeVue, Tailwind CSS, SCSS, and reusable component patterns.
- Build enterprise dashboards, multi-step workflows, responsive client portals, bilingual Arabic/English RTL/LTR interfaces, and role-based experiences.
- Integrate REST APIs and real-time features with Axios, WebSockets, and STOMP while contributing to feature-based Clean Architecture and scalable frontend systems.

Programming Instructor

2024 - Present

- Teach Arduino, AI, Machine Learning, Computer Vision, Scratch, Python, and C Programming through practical projects and structured problem solving.

CORE SKILLS

SELECTED PRODUCT ENGINEERING WORK

Education System (EduHub) - Multi-Tenant SaaS | Nuxt 3 · Vue 3 · TypeScript · Pinia · REST APIs

- Built configurable teacher-branded education experiences with course discovery, digital/printed books, protected multimedia, exams, homework, student dashboards, payments, learning progress, SSR/SEO, RTL, and domain-based multi-tenancy.
- Structured the frontend with feature-based Clean Architecture, API services, repositories, use cases, controllers, reusable models, and regression coverage for authentication, purchases, exams, protected content, SEO, and tenant behavior.

Orbit System - Engineering ERP Ecosystem | Nuxt 3 · Vue 3 · TypeScript · Pinia · PrimeVue · WebSockets

- Built workflows and dashboards spanning client requests, quotations, technical studies, designs, permits, approvals, tenders, supervision, invoicing, HR, attendance, tasks, meetings, documents, tickets, and project delivery.
- Integrated REST APIs and real-time WebSockets/STOMP features with protected routes, role-based permissions, notifications, chat, project monitoring, and reporting tools.

HSE Management System - Safety Operations Platform | Vue 3 · TypeScript · Pinia · PrimeVue · Tailwind CSS

- Developed enterprise modules for projects, workforce, equipment, hazards, incidents, inspections, audits, investigations, CAPA, permits, PPE, drills, meetings, risk workflows, notifications, dashboards, and PDF/Excel reporting.
- Implemented investigation and corrective-action workflows with evidence, witness statements, root-cause analysis, Five Whys, due dates, verification, lessons learned, closure tracking, and bilingual RTL/LTR support.

EDUCATION & TRAINING

Faculty of Engineering - Mechatronics Department | 2019 - 2024

NTI Embedded Systems - Trainee | Microcontroller programming and hardware-software integration
